Lens Design

- The Swan-Jacob Autoclavable Gonioprism is a glass lens designed for easy manipulation for goniotomy and direct viewing gonioscopy for adults and children.
- It provides a clear view of the angle during goniotomy surgical procedures.
- OSJAG8 has 8mm diameter contact suitable for laboratory animals and pediatrics. It has relieved anterior for access to clear cornea.
- It has a black anodized aluminum handle.

Cleaning & Disinfection

See Cleaning Method 3

Warnings

- Allow device to air cool approximately 20 minutes before handling and use.
- Use of third party devices and attachments may void the manufacturers' warranty.
- Slight changes to the appearance, such as color, of the adhesive are normal with repeated sterilization and use.
